

## QUALITY POLICY

As a pharmaceutical wholesaler, Euromedic Group is committed to providing high quality service to its partners. The safety of the medicines we supply is underscored by the full range of our companies' activities pursued in compliance with the relevant European and Hungarian regulations.

In addition to medications distributed in the Hungarian and international markets, our range of products includes food supplements, medical devices and hospital equipment.

Euromedic Group plays a very important role in supplying the necessary medicines and devices to Hungarian hospitals. At the same time, we are happy to meet the needs of pharmacies and other distributors as well.

Our prime concern is to reach out and obtain any medications in short supply in the Hungarian market as fast as possible and ensure a stable and consistent supply of medicines. We attach great importance to procuring products not available in Hungary, thereby providing a fast and impeccable service to the hospitals who we deliver to.

To deliver the products in accordance with the conditions set forth in relevant regulations we rely on our own vehicle fleet and on contract partners.

At Euromedic, we are committed to making the safety of medicines our top priority in order to ensure the continued safe use of pharmaceuticals for patients and health-care providers alike and comply with the relevant regulations and directives issued by the authorities.

We are convinced that the safe treatment of patients with medicines is in our common interest.

In accordance with that conviction, we lay particular emphasis on collecting and forwarding for investigation any comments or observations concerning the quality, or potential adverse reactions relating to the use, of the products we store and supply, acting in conformity with the European Union's medicines authorities and sharing relevant information in a mutual fashion, in compliance with our obligations as spelled out in legal regulations.

Should you have any observations regarding potential side effects in connection with the use of any of the products stored or supplied by Euromedic Group, please do not hesitate to contact us at any one of our contact details listed under the *Contacts* heading, or just click on the link provided there to send your comments directly to the Hungarian National Centre for Public Health and Medicines (Nemzeti Népegészségügyi és Gyógyszerészeti Központ, NNGYK).
